

CALL FOR PAPERS

The *Journal of Imagery Research in Sport and Physical Activity* is a new scholarly peer-reviewed, all electronic journal that publishes original research, reviews, and theoretical or conceptual papers related to understanding the role of imagery in sport, physical activity, exercise, and rehabilitation settings.

We are one of The Berkeley Electronic Press (www.bepress.com) journals and are dedicated to revolutionizing the academic publishing process. The Berkeley Electronic Press aims to use organizational and technological innovations to improve scholarly communication; to enhance the interaction among authors, editors, and readers; and to enable editors to produce scholarly materials without assistance or delays. The Berkeley Electronic Press tackles the problems scholars face in disseminating their work by offering a community-based solution in the form of peer-reviewed journals owned by the community of scholars.

We aim to be the finest source for up-to-date information on imagery in physical activity settings. The journal's Editors and members of the Editorial Board are committed to building the *Journal of Imagery Research in Sport and Physical Activity* into the leading journal in its field by publishing articles of outstanding quality that merit the attention and interest of all those interested. The *Journal of Imagery Research in Sport and Physical Activity* will be available at very affordable subscription costs to readers around the world via the Internet.

We strive to publish research that is of the highest scientific quality in terms of originality and significance. Criteria for publication will include:

- Outstanding quality; likely to be widely read and highly cited;
- Relevance to the area;
- Contribution to the advancement of imagery research;
- Interest to specialists in the field and accessible to researchers with interests outside the immediate topic of the paper;
- Readability and presentation.

We envision three sections to the journal:

- The journal will primarily focus on publishing original research (quantitative and qualitative research designs), reviews, and theoretical/conceptual papers.
- The journal will occasionally feature an “*It’s a promising start...*” section which will include pilot-type studies that have interesting results but *recognized* methodological limitations (i.e., case studies, smaller sample sizes, etc). These publications will be rare, and in the form of a short note or brief report.
- The journal will publish a summary of imagery-related publications from other journals in a digest format thereby making it the finest source for up to date imagery research.

We strongly encourage authors to present data and results which utilize the features of the electronic media and web publishing. For example, authors can include color in tables and figures, and can attach additional files such as video/audio clips that may show the experimental procedures. Among the other innovative features of the journal, we wish to highlight the following:

- We operate a full electronic submissions service which allows authors to send both their initial submission and revised version in electronic form with no need to send paper copies.
- Articles are published as soon as they are accepted rather than waiting for an issue to be completed which significantly shortens publication times compared to printed versions of scholarly journals.
- The electronic publication gives most readers access to the papers at their desktops.

- “*Authors as typesetters*” means that authors will never again scour copyedited manuscripts or galleys in search of errors introduced by copyeditors and typesetters. What authors wrote is exactly what the readers will see.
- Reviewers who write especially insightful reviews will be invited by the Editors to publish them as comments

The *Journal of Imagery Research in Sport and Physical Activity*
will start publishing articles in the Spring of 2006.

The Editors are Dr. Craig Hall and Dr. Sandra Short.

Members of the Editorial Board and guidelines for submission are found on the journal’s webpage at
